

21-23 JULY 2021 +
ICC SYDNEY

Security Exhibition & Conference

The world and the security industry have changed forever. Integrating physical security controls with advanced technology is top of mind worldwide.

Increased demand for thermal imaging technology, touch-free biometrics and AI highlights just how essential security technology is to society. Public safety is at the forefront and security is more critical than ever.

This industry has and will continue to meet challenges head on at the Security Exhibition and Conference, demonstrating the development of a raft of new solutions to essential hardware and security needs. Witness firsthand the developments that are changing how we respond to and analyse future information.

This is Security 2021 – empowering industry for this new, smarter, changed world.
