

## Security Exhibition and Conference 2023 - Marketing Blurb

### Short Overview:

The security landscape is evolving at lightning speed. With the advancements in AI, machine learning, cybersecurity, mobile access, and cloud technologies, security professionals must equip themselves with the latest technology for more sophisticated threat detection and response.

For more than thirty years, the Security Exhibition and Conference has been at the forefront of driving the future of security. And in 2023, Security - co-located with Integrate, the region's premier AV event - will showcase industry-leading solutions and provide attendees with the knowledge they need to stay ahead of the game.

Join us to Secure the Future this 30 August - 1 September.

### Extended Overview:

The security landscape is evolving at lightning speed. With the advancements in AI, machine learning, cybersecurity, mobile access, and cloud technologies, security professionals must equip themselves with the latest technology for more sophisticated threat detection and response. Attending this event will keep you at the forefront and protect your business from increasingly sophisticated threats.

For more than thirty years, the Security Exhibition and Conference has been at the forefront of driving the future of security. And in 2023, Security - co-located with Integrate, the region's premier AV event - will showcase industry-leading solutions and provide attendees with the knowledge they need to stay ahead of the game.

As the most established and respected security trade event in Australia, the Security Exhibition & Conference will bring together the full spectrum of suppliers, industry professionals and end-users to connect and source essential solutions to meet modern security challenges.

The event covers the latest products and solutions in:

- Access Control & Perimeter Protection
- Biometrics & Identification
- Advanced CCTV & Video Surveillance
- Cyber & Information Security
- Smart Home Automation
- Alarms & Fire Safety
- Smartlocks, Safes & Hardware
- Networking & Integration
